

# Edouard Borrel

Program Manager

Total quality oriented, with an experience of 18+ years as Senior Business process analyst and Management consultant, specialized in the integration of operational and financial flows (encompassing Fiscal and Legal structural aspects), and cross-functional and inter-cultural team management.

Edouard gives matter to the vision of its clients, with high autonomy, up until the delivery and handover. He is used to deal with complexity in business environment as well as in techniques, with a highly demanded level of quality. Able to manage and/or design structured and robust solutions to answer intricate issues, dealing with emerging complexity and its new paradigms, and reducing the complexity into a model. Throughout the value chain, he integrates new trends from marketing developments that drive future financial requirements, throughout the necessary business processes.

His MSc. in Civil Engineering (2000), with a major in Environmental fields (especially Networks design, financing and operations management), and his Executive MBA (2013) allowed him to adapt from traditional project management (TPM) methods for relatively certain environment, to more agile and adaptive ones (APM) for highly changing business environment characterized by its uncertainty.

He also developed an ability to anticipate risks incoming from the integration of the requirements and constraints.
